

# "YES! We want to keep on riding in Hakuba!"

**As a snow community, we support Hakuba to lead the fight against global warming as a global sustainable mountain resort.**

To the mayor

[ Our Request ]

After all reports about climate change from all over the world, we cannot deny the fact that we are continuously having shorter winters with less amount of total snowfall. As a snow community, we get our voice from each skiers/snowboarders and "snow freaks" together to fight against climate change, and inherit our heritage for next generations. And we strongly support Hakuba Village as one of the international mountain resorts in Japan to be a world leading sustainable mountain resort. Our future is in our hands. To protect our winters and beautiful seasons in Hakuba, and to leave them for our future generations, we are all here for you.

[ The Purpose ]

While our winter is threatened by climate change, we will send our voice to Hakuba Village, known as the international mountain resort with its beautiful natural environment and traditional mountain culture. To leave this snowy winters to our future generations, Let's support Hakuba village to be a leader of environmental actions such as promoting energy efficient buildings, sustainable energy system, electric vehicles and car sharing, banning single-use plastics, and sustainable agriculture to fight against climate change.
